Important Information

The unit fund principally holds units in the underlying asset and there will be a cash balance (debit or credit) to facilitate dealing. Pricing will take into account the market price of the underlying asset and the net unit fund cash flow. In consequence, the unit fund's price and performance should broadly mirror the underlying asset, although there will be variations from time to time.

The benefit from a Hansard International product is primarily determined by unit fund performance over its lifetime; other factors may be more important, especially on early surrender, in certain cases. You may get back less than you paid in.
